

## MAY NEWSLETTER ROOM 7

Dear Families

Spring has sprung! We are enjoying the nice weather and being able to spend more time outdoors. We are working hard on our outside environment, planting working with the compost, and observing birds with the new bird houses.

Early this month we will finish our Timeline of Life, country, state, and biome projects and move into learning about Early Humans and their Fundamental Needs. We will video the presentations of their projects and send it out via email. We are continuing work on test tubes, division stamp game and abstract subtraction. We are working on writing sentences, paragraphs and stringing paragraphs together. Room 7 is working hard to finish this year strong, both academically and socially. 3rd graders are getting to spend some time with room 9, socially distanced outdoors as they are preparing for next year's transition. We will be spending time at recess with the new incoming first graders to get to know them, and make them feel welcome.

*\*\*Please help your child be aware of the weather and what they need: water bottles, hats, sunscreen, etc... so that they can enjoy recess time.*

### IMPORTANT CLASSROOM DATES AND REMINDERS
