

APRIL NEWSLETTER ROOM 4

Hi fabulous families

Well, we made it to spring! Bring on the fresh air, rain and flowers. April showers bring May flowers which leads us to the water cycle. We will be learning how the water goes around and around, which then brings us to the clouds, learning to recognize them, and identify which ones are full of rain.  We will watch the trees wake from their winter nap and bloom to brighten our landscape. We will watch and listen for the birds to return, build nests and lay eggs as well as learn the parts of a bird and learn about the many kinds of birds. Continent focus will be Africa, along with the biomes, beautiful landscapes, and amazing animals. Our study of the polygons will continue through April.
