

MAY NEWSLETTER ROOM 4

Can you believe its the last month of school! With that brings a busy month with preparing for Kindergarten graduation. Graduation details will be detailed later, but I can tell you it will be outside, out front in the parking lot and be prepared to decorate your car!

Now that the flowers are in bloom we will begin our study of the parts of a flower and the life cycle as well as the many different types.

We will also begin our study about planting vegetables and fruit. How they grow, parts that we eat and some tasting!

And don't forget the insects, we will focus on ladybugs and grasshoppers. We will learn the parts, the life cycle and some special traits about each of them.

IMPORTANT CLASSROOM DATES AND REMINDERS
