

APRIL NEWSLETTER ROOM 1

Dear Families,

Welcome back! I hope everyone had a great spring break. We are in the home stretch of a great school year.

This month we are beginning our study of Africa. We will study maps, animals, people, etc. Our study of birds will finish up our animal classifications for the year. We will continue our study of weather with a focus on the water cycle. This will include lots of fun experiments. In addition, we will take a look at plants. The children will gain an understanding of the needs and parts of plants.

In honor of earth day, we will focus on recycling and smart environmental choices. We will also raise caterpillars and release them when they make their big transformation.

We are having parent teacher conferences at the end of this month. Details regarding conference logistics are to be determined. As soon as I know, I will let you all know. I am really looking forward to getting some time to talk to all of you about your children.

Cheers, Ms. Laura

IMPORTANT CLASSROOM REMINDERS

Sign ups for parent teacher conferences will be available via sign up genius. Be on the lookout for that email. Please take a moment to sign up for a 30 minute slot. Details to come!
