

JUNE NEWSLETTER ROOM 7

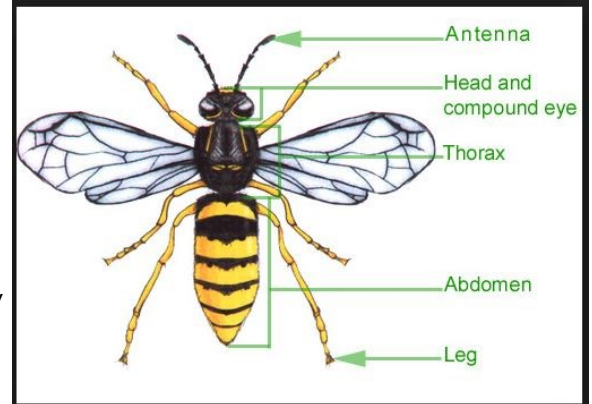

Room 7 Friends,

We will learn about insects this month, discovering how some are helpful while others are harmful.

We will look at some new landforms, the gulf and the peninsula and review the biomes of the earth.

We will continue our investigation of seeds, which conditions are necessary for germination and how insects help in "propagation".

Our music and art appreciation will focus on folk songs and art around the world.

Miss Christine & Miss Ashly
