May Newsletter

Here we are in the last month of school. Time seems to go by so fast, it feels like we just started school and before you know it, we are in the last month. We have had a fabulous year with making new friends, learning so many new things, discovered our feelings and how to name them as well, we have all grown in so many ways. I hope you all have a great summer; I'll see most of you back in the fall.

Our focus this month in science will be flowers, the parts of them and the different types. In geography we will investigate Africa with its landscape and animals.

Social/Emotional Concept: Boredom. Boredom is GOOD for you! Kids can be bored in a classroom, at home, or anywhere they go and anything they do. There are two kinds of boredom, one is task boredom, and the other is no task boredom. Task boredom is when you must do something you're not interested in, and no task boredom is when you watch grass grow with nothing to do. No task boredom is great because now you can build creativity, and flexible thinking, task boredom is a lesson in not everything is fun but you must complete the task.

CLASSROOM DATES AND REMINDERS

Make sure you check for items in cubbies to be cleaned out on their last day.
