

May Newsletter Room 7

Dear Room 7 Families;

G'day Mates! Hang on tight, we're going "down under"! We'll learn about the most unusual animals on planet earth. Did you know that Koalas *don't drink water*!! Ever heard of an ugly baby? Probably not, but Koalas, like other marsupials are UGLY at birth.

Here are some other areas of study this month:

Composer of the Month: Let's learn about Frederic Chopin, a famous Polish composer. He wrote over two hundred pieces of music. He is considered one of the best pianists- **ever!** We'll "hear" just why people are amazed with his music.

Artist Study: Henri Matisse will be our featured artist this month. He was well known for his abstract paintings as well as his "paper cuts" that he explored later in life. We'll have some fun cutting our own art creations.

Science: Flowers! Have you ever marveled at the symbiotic relationship that flowers and pollinating insects have? We will be learning the parts of the flower, their functions and just how much flowers and insects depend on each other.

ATTENTION!: Kids bring in a photo of your Pet by May 6th!!!

Miss Christine & Miss Ashly

Flowers whisper "Beauty!" to the world, even as they fade, wilt, fall.

Dr. Sun Wolf
