

March 2023

Dear Room 8 Families,

We have a fun and project filled month ahead of us. We will learn about the Time Line of Life and all the amazing creatures that have roamed the Earth. We will have a display in the classroom about all the amazing creatures.

March 17th is St. Patrick's Day and we need to prepare our class for the arrival of the Leprechauns. We will study simple machines to help us design some amazing Leprechaun traps. We will send more information home. Leprechaun traps are due March 16th.

Worm Moon

Celebration Tuesday, March 7th
