

March 2023 Newsletter

Dear Families,

Can you believe it's already March? I'm ready for more daylight, warming weather, flowers blooming and outdoor lunches.

This month we will focus on solidifying our abstract cube rooting and square rooting understanding. 4th years will be learning about exponents. We will be finishing up our Medieval unit and looking at other past civilizations.

We will have the opportunity later this month to take a field trip to watch Ms. April perform in Beauty and the Beast with her acting troupe.

As the weather is still unpredictable, please make sure your students are dressing for the weather.

I'm excited for a fun-filled spring!
