

**April 2023
Room 3
Newsletter**

Hello Families

With spring here, we will focus on this beautiful season by exploring the outdoors. Our science subjects this month will continue with the seasons, types of weather, and the water cycle. We will also start learning about plants by looking at the life cycle and the different parts.

In honor of Earth Day we will talk about what it means to be an environmentally conscious citizen. We will learn about pollution and ways to take care of Mother Earth. If the weather cooperates, we will plant some flowers and clean up around the school.

Our geography studies will take us to Australia. We will learn about the unique animals and biomes that make up this great continent.

Our animal focus will be on the classification group of fish. We will also learn about the 5 different oceans that make up planet Earth.

The weather will still fluctuated wildly this month. Please help your child pick appropriate clothes to wear and bring to school. Also, please take a moment to check your child's cubby for weather appropriate extra clothes.

Our **Parent Teacher Conferences** sign up sheets will be available soon! Please take a moment to sign up for your half hour slot. On Wednesday, April 19th there will be afternoon spots available for those who are all ready enrolled in the afterschool program, there will be no additional care. On Thursday (20th) and Friday (21st) there will be no school but childcare will be available during your conference time.
