

October 2023 Newsletter

Dear Families,

September flew by! Students are working hard to get back into a routine and fourth year students have been learning the ropes in a new classroom.

This month is going to bring us some exciting projects. 6th years will be starting their island projects, 5ths will dive into the timeline of humanity, and 4ths are learning about atoms, molecules and matter.

As a class, and a school, we are also starting our Wax Museum projects! Your student will soon be choosing a valuable historical figure to research. They will have the opportunity to “become” this person and present important details about their life. Please keep an eye out for more information about requirements and deadlines. Presentations are set to take place November 2nd at 8:30am.

October 24th room 9 will take our annual field trip to Celebration Park located south of Melba along the Snake River.

This month also brings us to our first parent/teacher conferences. These will be held October 26th. Sign up sheets will be available soon! I’m looking forward to meeting to share your student’s progress.
