

## October Elementary 1

### Important Dates

Dear Families,

Hello, Fall! Our first month of school is behind us and the classroom seems to be settling in to the routine of learning together. We are all working on our math, reading and writing skills.

Academically, we are implementing full time a brand new program called UFLI Foundations. It is a program developed by the University of Florida to teach the necessary skills to be proficient in reading. The scope and sequence is systematically designed for each child to apply each skill with confidence and automaticity. We are very excited for a full, well-researched curriculum to supplement our Montessori method. In our cultural studies, we have been learning about creation stories including the scientific creation story, the Big Bang Theory. Students are captivated by our universes. If you would like to supplement at home, I recommend the documentary, Cosmos.

- Ms. Maria
