

December 2023
Room 6

Hello Families,

It's crazy to think we are already approaching the end of 2023! This will be a fun month as we continue the holiday festivities and start preparing for our Winter Performance. More information about the performance will be sent out.

This month, we will be focusing on the continent of Antarctica. We will cover what kinds of animals can be found here, as well as the only type of biome that makes up this snowy, cold continent.

I also wanted to give everyone a heads up that I will begin to lock my door at 9:05 am starting the first week of December. If your child arrives after the door has been locked, they are welcome to wait outside the classroom with you, or up at the front until group time is over. It is very important that we start class on time. When the door opens after group has started it causes the children to lose focus on what I am teaching them. As we continue building independence, I would like us to start working on letting the kids change their shoes and put their bags away on their own. Please work on saying your goodbyes at the door. This helps the children settle in quickly as they take ownership of their new abilities.

As always, please let me know if you have any questions or concerns!
