

March 2024 Room 9

Dear Families,

Can you believe it's already March? The time has come for longer days, warmer weather, our first flowers to bloom and outdoor lunches to return. Although, the past few weeks haven't felt much like spring.

Room 9 fifth years have been working on their Medieval simulation (involving everyone since our class is small). Fourth years are learning about cells and will soon be summarizing the story of Gilgamesh as they learn about ancient Mesopotamia. Sixth years are learning about US history and continue to work on assembling their islands.

In math, we are cube rooting, multiplying decimals, and working with fractions both with materials and abstractly. As we enter warmer months and the weather continues to warm, I look forward to having the opportunity to give lessons and work outdoors.

All School Bulletin
